

SAUNA
HEATERS

Tower

Electric Tower Heaters are available in three different models, round, wall and corner. They come in various sizes to choose from any demanding sauna needs and layouts. Due to smart design, Sawo tower heaters does not just give unique look to new sauna rooms but are also tremendous option for replacement of an old traditional wall mounted heater.

Sawo tower heaters are made of robust, rust and corrosion free, stainless steel to give them long life time for years and years to enjoy. Large stone capacity, holding stones from 70 kg up to 360kg, ensure that heat is released evenly and prolonged, therefore giving the user a nice experience throughout the session. The intensity of the steam can be adjusted. By throwing water on the lower part of the heater steam is milder. Upper part and top of the heater gives more sharp steam.

Loading stones is made convenient with removable rings around the mid section of the heater. This way stones can be arrange correctly even in the bottom for better heat distribution and longevity of heating elements.

Indulge your body and soul like never before with our latest addition to our heater family.

Tower Heaters

They are available in Black color.

Round Tower heaters

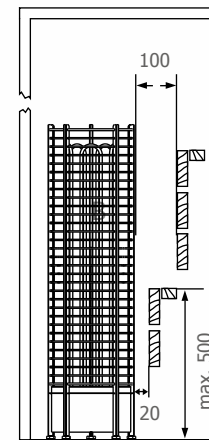

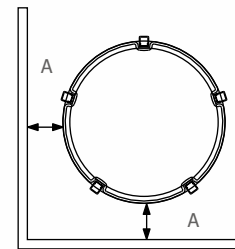

Incredible tower design, free standing guaranteed to deliver massive heating performance. By installing heater in the center of the sauna room, steam can be generated in 360 degrees radius.

Can be embedded to the lower bench. Embedding flanges are available in soap stone and stainless steel to add style and covering the edges of the opening.

Heater Guard

Heater Guards and Embedding Flange

Sawo heater guards add safety and style to your sauna room. Laminated construction provide, not just looks but stability and durability too. Heater guards come with stainless steel brackets which makes installation hassle free. Available in Aspen and Cedar.

If you want to embed your heater in the sauna benches, embedding flanges give you nice finishing touch. Available in Soap Stone and Stainless Steel.

Soapstone Flange

Stainless Steel Flange

Corner Tower Heaters

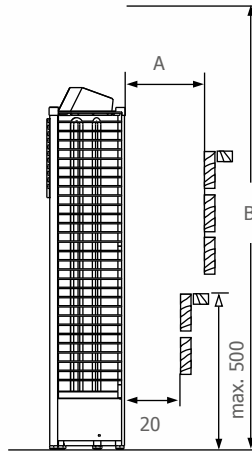

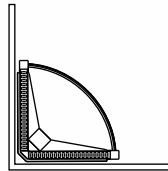

Corner design will snugly fit to a corner of the sauna room. Perfect choice for tight space conditions or to replace the old heater.

Can be embedded to lower bench. Embedding flanges are available in soap stone and stainless steel to add style and covering the edges of the opening.

NB heater model
with a built-in control unit

NS / Ni heater model
requires a separate control unit

Controls

Tower heaters are user friendly making setting and using the heater hassle free. They are available in built-in NB model and with separate control unit NS model.

NB model is more traditional way of controlling the heater by adjusting temperature and time with the knobs on the side of the heater.

NS models need external control unit with control interface that can be installed outside the sauna room. From interface, temperature and time can be set precisely as preferred to ensure a truly pleasurable experience to the bather. Also other sauna features such as light and fan can be controlled with same control unit.

In addition, TH6, TH9 and TH 12 are available in Ni model. Control unit can plug in directly to the heater, therefore there is no need for external control box unit.

Innova Controls

With Innova Control Unit you can easily adjust the temperature, humidity*, ventilation* and light intensity* in your sauna. It also has self-learning pre-run timer, so you can have your sauna exactly how you like it!
